

WaveStar™ Software for Oscilloscopes

► WSTRO

► Features & Benefits

Capture Measurement Waveforms and Data Easily Without Programming

Create, Edit and Transfer Telecommunication Masks

Access, Organize, Move and Manipulate Instrument Files

Data Log Measurements from Single or Multiple Instruments

Perform Harmonic Analysis on Power Waveforms

Control Instrument Settings and Measurements Remotely from the PC

Works on Tektronix Open Windows Oscilloscopes

WaveStar Reader Application Included for Information Sharing

Software to Capture, Analyze, Document and Control Data

WaveStar for Oscilloscopes is a Microsoft Windows application bringing measurement information to your Windows desktop.

Capture

Set up communication to instruments through the WaveStar Instrument Manager. The Explorer View displays these instruments and reveals their corresponding properties. To capture measurements, select a property, click, drag and drop into an active application sheet and begin analysis.

Analyze

Use up to twelve data sheets for analysis:

Graticule Sheets – Capture waveforms in YT or XY mode. Graphically view or edit multiple waveforms and masks on a graticule with the same scale and position as the oscilloscope. Includes cursor measurements, horizontal and vertical gates, zoom function and annotation.

Instrument Explorer Sheet – Move and manipulate files to and from the MS Windows desktop or other instruments, add/delete directories, format drives and more.

Stripchart Sheet – Automatically plots multiple waveform measurements, such as rise time data, in a classic stripchart fashion. Sheet features cursor measurements, alarm control and annotation capabilities.

Tabular Sheets – Capture, store, display and edit either waveform or data log information as a table of numbers on corresponding sheets. The Scalar Viewer Sheet displays measurements from the oscilloscope.

Measurement Sheet – Calculate frequency, pulse width, rise/fall time, duty cycle, overshoot, peak-to-peak, amplitude, min, max, mean, cycle mean and RMS measurements.

Harmonic Analysis Sheet – Produce power waveforms from current and voltage and calculate up to 51 harmonics.

Notes Sheet – Prepare simple reports; capture and save instrument hard copy; save, edit and restore instrument setups.

Document

Quickly and simply insert information into Microsoft Office applications, such as Excel, Word or PowerPoint. Transfer information into Microsoft Windows applications, such as MATLAB, through the MS Windows clipboard.

► Characteristics

Software Compatibility

Instrument Interface Support –

GPIB, LAN or RS-232 interfaces with full talk-listen modes.

Windows Clipboard –

Drag and drop to compatible Microsoft Office applications or copy/paste through Windows clipboard.

Printer Plotter Support –

Uses standard Microsoft Windows printer drivers.

Waveform Export Format –

Microsoft Excel 6.0 compatible.

Computer Configuration

Required –

Type: IBM PC-compatible.
Operating System: Windows 98SE/ME/2000/XP Pro or Windows NT 4.0, SP6+.
CD-ROM Drive: 4X or better.
Monitor: Super VGA.

Recommended –

Processor: Pentium, 500 MHz.
RAM: 128 MB.
Instrument Interface Card: GPIB: National Instruments or CEC IEEE-488 Interface Card.
RS-232: One free RS-232 port.
Ethernet Interface Card: Inquire about Tektronix AD007, GPIB-LAN Adapter, TekVISA™ on Tektronix Open Windows Oscilloscopes.
