

Drive to CAN FD Faster

Boost your Automotive Testing capabilities with fast debugging and validation of CAN FD signals.

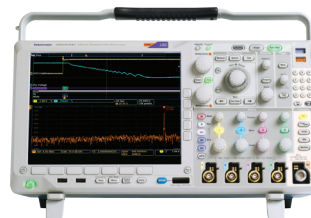

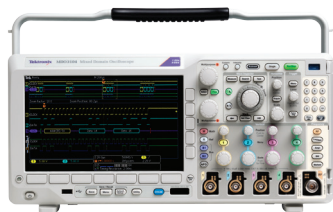

Troubleshoot ECUs, actuators and related sensors on the MDO3000 and MDO4000C Oscilloscopes with CAN FD.

Speed Up Design

- View bus data and evaluate bus waveforms simultaneously
- View sensor signals and CAN FD bus activity
- Powerful CAN FD triggering and searching capabilities
- Support for ISO and non-ISO versions

Tektronix Mixed Domain Oscilloscopes with CAN FD decoding, triggering and search

Tektronix Automotive Solutions

Validate and debug faster with MDO3000 and MDO4000C Series oscilloscopes equipped with an Automotive Application Module

- Decode up to three buses at once
- Extend your visibility with 16 digital channels
- Capture and simulate sensor signals with a built-in generator

MADE TO MEASURE Sales Event

Tailored Automotive Bundle

Automotive Bundle

Get visibility into your entire system for a price you have never seen before

SAVE
UP TO
28%

- Up to 4 analog measurement channels
- 16 digital measurement channels
- Decoding and Triggering for CAN, CAN FD, LIN, FlexRay, and many more

Buy any MDO3000 or MDO4000C Oscilloscope configured for debugging embedded designs, with digital channels and all available applications software.

STARTING AT \$5,675

SAVE UP TO 28%

Choose any MDO3000 or MDO4000C Series Oscilloscope

16-Channel Logic Analyzer (Option MDO3MSO/MDO4MSO)

Protocol Analysis Application Module (MDO3BND/DPO4BND)
Includes all functions of AERO, AUDIO, AUTO, COMP, EMBD, LMT, PWR and USB application modules

LIMITED-TIME PRICING

MDO4000C bundles include \$3,450 in savings and start at **\$10,350**

MDO3000 bundles include \$2,225 in savings and start at **\$5,675**
